Medical tape measure is used for precise body measurements. Knowing your waist measurement is useful for various reasons including health assessments and fitting clothes. Taking your waist measurement is easy when done the right way. With only a soft measuring tape and some know-how, you'll be set with accurate measurements in no time. Medical tape measure can be divided to three tapes: MUAC tape, Wound measuring ruler and Medical Measuring Tape. Wound measuring ruler is perfect for documentation used in photos of wounds. It is used to determine length, width, and depth. And wound measuring ruler includes wound measure tape, wound measurement ruler, wound measuring bullseye and so on. Wound measure tape is made from 250g Art Paper for greater durability. Wound measurement ruler has non-Glare surface. Adhesive is both high-tack and decals are removable without residue. Wound measuring bullseye use scentimeters and millimeters to document wound dimensions. Mid arm circumference tape is a insertion tape for measuring mid upper arm circumference to assess malnutrition. Head circumference measuring tape is perfect for measuring babies' heads. Wound measuring guide is a flexible tape measure features inches on one side and centimeters on the other.<http://www.tapemeasuring.com>
